### **DETAILED ACTION**

1. Claims 1-10 are currently pending.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 8 and 10 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for extracting soybeans to obtain isoflavones, does not reasonably provide enablement for extracting soybean residuum to obtain isoflavones. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to practice the invention commensurate in scope with these claims. Undue experimentation would be required to practice the invention as claimed due to the quantity of experimentation necessary; limited amount of guidance and limited number of working examples in the specification; nature of the invention; state of the prior art; relative skill level of those in the art; predictability or unpredictability in the art; and breadth of the claims. In re Wands, 8 USPQ2d 1400, 1404 (Fed. Cir. 1988).

Applicant's claims are drawn to extracting soybean residuum to obtain isoflavones. However, applicant's specification does not teach how the soybean residuum is obtained. Without knowing this critical step, a person of ordinary skill in the art clearly would not be able to perform the invention as claimed because the starting material is unclear. It is well known in the art that the success of an extraction procedure lies in precision among the extraction steps

Art Unit: 1655

because the success of an extraction can be unpredictable. Thus, a person of ordinary skill in the art does not have enough information to carry out the invention as claimed because the starting material has not been properly defined.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

3. Claims 1, 7, and 8 are indefinite because the definition of "sopped" is unclear.

### ***Conclusion***

4. Although they are considered unclear as drafted, claims 1-7 and 9 are considered free of the art. The closest prior art in US Pat. Pub. No. 2003/0108657 and US Pat. No. 6,410,699. these references teach extracting fermented soybean with ethanol to isolate isoflavones. However, the references do not specifically teach all of the steps claimed by applicant. In addition, the references do not provide motivation to carry out the steps claimed by applicant.
